Paper Stock

Compucolor carries a wide variety of paper stock to accommodate your design needs as you see fit. The list below is representative of our current inventory, if there is a stock you prefer that you do not see below please call us and we'll make arrangements.

8 PT. C2S - < 8 points in thickness, gloss coated both sides >

10 PT. C2S - < 10 points in thickness, gloss coated both sides >

12 PT. C2S - < 12 points in thickness, gloss coated both sides >

This is Compucolor's standard for our 4 color over 4 color printing.

80# TEXT

Comparable to a light magazine cover, this is Compucolor's standard glossy stock. Is used for products such as books, pages of reports, and other items that do not require the stiffness of card stock. Generally is a higher quality sheet.

100 # TEXT

A thicker and heavier version of the 80# Text.

10 PT. C1S - < 10 points in thickness, gloss coated on one side >

This stock is typically used when you want one side to be able to write on. e.g. Business Cards.

12 PT. C1S - < 12 points in thickness, gloss coated on one side >

This is the primary stock used for our 4 color over black printing, it is thicker than the aforementioned 10pt. C1S. thus more sturdy.

80# Uncoated Cover

100# Uncoated Cover

Aqueous Coating

A water based coating which is applied in the same manner as ink. Primarily used to protect from dirt and fingerprints and enhance the printed piece with a high gloss surface.
